Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 3 recite, inter alia, a low-voltage circuit section, which compares the soft start voltage with a feedback voltage obtained by feeding back the output voltage, for producing a pulse signal when the soft start voltage is high; and a high-voltage circuit section, which compares either a second reference voltage or the soft start voltage with the feedback voltage according to a relationship of a level of the second reference voltage and a level of the soft start voltage to produce an error signal, for producing a PWM control signal based on a comparison result of the error signal with a triangular wave signal, wherein when the output voltage is lower than the first reference voltage, the pulse signal is output as the switching control signal, and when the output voltage is higher than the first reference voltage, the PWM control signal is output as the switching control signal.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include either of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 5:30am-2:00pm.
